DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1-38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of copending Application No. 6,320,744. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of claims 1-25 in U. S. Patent 6,320,744 encompass the limitations of instant claims 1-38, for example: applicant has amended "mounting features" to "at least one mounting feature", which is a same meaning and a structure of the mounting feature, the at least mounting feature maybe one or more than one of mounting features, and also, applicant has an additional limitation of heat transfer means. The heat transfer means can be replace with a plurality of ventilation holes in an installation frame in order to release heat from units or modules in store in the frame.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 1-38 are obviousness-type double patenting as being unpatentable over claims 1-25 of copending Application No. 6,320,744. Examiner requests applicant to file a terminal disclaimer; therefore, claims 1-38 can be allowed.

Response to Arguments

1. Applicant's arguments filed 6/19/02 have been fully considered but they are not persuasive. Even though, applicant has amended claims, but they still a nonstatutory double patenting rejection based on U. S. Patent 6,320,744..

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
